

Ten Tips for Cybersecurity Protection

Protecting your company from cyber catastrophe in today's constantly evolving digital landscape first requires acknowledging that a damaging cyber breach could very well happen to your organization. As they say, acceptance is the first step. There are increasing numbers of attacks in organizations within multiple sectors across the globe.

The size of an organization does not matter either. In fact, nearly half of all cyber attacks globally last year were committed against small businesses for one simple reason: **inadequate defenses.**

Here are 10 insightful tips that you can implement to make your business more secure in the face of rising cyber threats:

- 
1 REDUCE EXTERNAL CONNECTIONS
- 
2 KEEP SYSTEMS AND APPLICATIONS UP TO DATE
- 
3 BACK UP ALL DATA
- 
4 ENCRYPT DATA
- 
5 MAKE MULTIFACTOR AUTHENTICATION A MANDATE
- 
6 DILIGENTLY MANAGE AND LIMIT ADMINISTRATIVE PRIVILEGES
- 
7 SEGMENT AND SEPARATE YOUR DATA
- 
8 HAVE A CRISIS RESPONSE PLAN IN PLACE
- 
9 IMPLEMENT SECURITY AWARENESS AND TRAINING
- 
10 ISOLATE WEB FACING APPLICATION
